### **ARTIFICIAL TURF TO BE INSTALLED ON SOZO FIELDS**

The first artificial turf at the new SOZO SPORTS complex in Yakima will be installed starting tomorrow (Thursday) at 9:00am. The turf will make up two fields in the multi-field complex. Once the artificial turf is installed, a mix of sand and pellets will be put down over the top of the faux grass to make them ready for play.

Last Fall and earlier this year grass was planted for the creation of six fields at SOZO SPORTS. Those six natural grass fields will be ready for play on July 30 Field Day.

The creation and installation of the first fields is phase one of a multi-phase plan that will include both indoor and outdoor fields for soccer, football, lacrosse and other sports. When finished, SOZO will be one of the largest multi-purpose grass and turf complexes in the Northwest and will draw teams and spectators from around the region.

For more information on the SOZO project go to [www.sozosports.net](http://www.sozosports.net) or the SOZO Sports of Central Washington's Facebook page.
